Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on July 19, 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 19, 2007 has been entered.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 11, 14-19, 21, 22, and 24-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hardy et al ('308) in combination with Taylor et al and Jensen. Hardy et al ('308) teaches a surgical system which superimposes the display of various anatomical images and the image of a tool to be inserted into the tissue, the capability of simulating the probe's trajectory is also disclosed (see column 12, line 57 to column 13, line 4), Hardy et al ('308) also incorporates by reference U.S. Patent 5,099,846, which discloses, at column 13, lines 19-38 thereof for example, the display of the simulated probe trajectory on the displayed image. Taylor et al teach employing a pantographic mechanism which can be used manually or via a computer to control the insertion and manipulation of a surgical tool within a body. Jensen also teaches the use of a pantographic device to control the manipulation of a surgical tool and also teaches the desirability of providing tactile and position feedback to the operator. It would have been obvious to the artisan or ordinary skill to employ the pantographic mechanism to control the tool of Hardy, since Hardy teaches no particular mechanism by which the device is situated in the patient, or alternatively to employ the image superposition device of Hardy in the device of Taylor et al, since this would be useful for planning the surgery, as taught by Hardy, and in either

case to employ the positional feedback mechanism of Jensen, since these are equivalent to and useful in conjunction with the tactile feedback of Taylor et al, and further to employ a second pantographic mechanism, since this would enable the use of a second tool in the surgery, is not critical and provides no unexpected result, thus producing a device such as claimed.

Applicant's arguments filed July 19, 2007 have been fully considered but they are not persuasive. The arguments are not persuasive for the reasons set forth above.

All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
